TEAM

Roofing contractor: Team Roofing, Winston-Salem, N.C., www.teamroofing.net

Roof manufacturer: IMETCO, Norcross, Ga., imetco.com

ROOF MATERIALS

An IMETCO Series 300 metal roof system—24 gauge, 18-inches wide, epic bronze color—was installed on the 45,000-square-foot roofing project.

ROOF REPORT

The reroofing project, which took place in October 2011, includes 105-foot-long roof panels that were formed on the jobsite with a 16 station rollforming machine. This is the same machine that is used in the factory. The “mobile factory” comes complete with a tension leveling system and decoiler. The project also includes radiused panels that were curved onsite. △
