

Description

The Element architectural wall panel system is a horizontally or vertically applied metal panel. Its interlocking legs create a 3/4" or 1" reveal line and concealed clips improve strength and flatness. This durable system combines aesthetic appeal with the quality assurance of IMETCO products in an easy-to-install panel system that is ideal for architectural wall and rainscreen applications.

Element panels are factory-fabricated to IMETCO's legendary standard of quality, and backed by unparalleled service and support.

Design Characteristics

- Interlocking seams with concealed clips
- Install over solid substrate with underlayment or over hat sections
- Standard Panel Depth: 1-1/4"
- Includes a 3/4" or 1" reveal

Available Materials

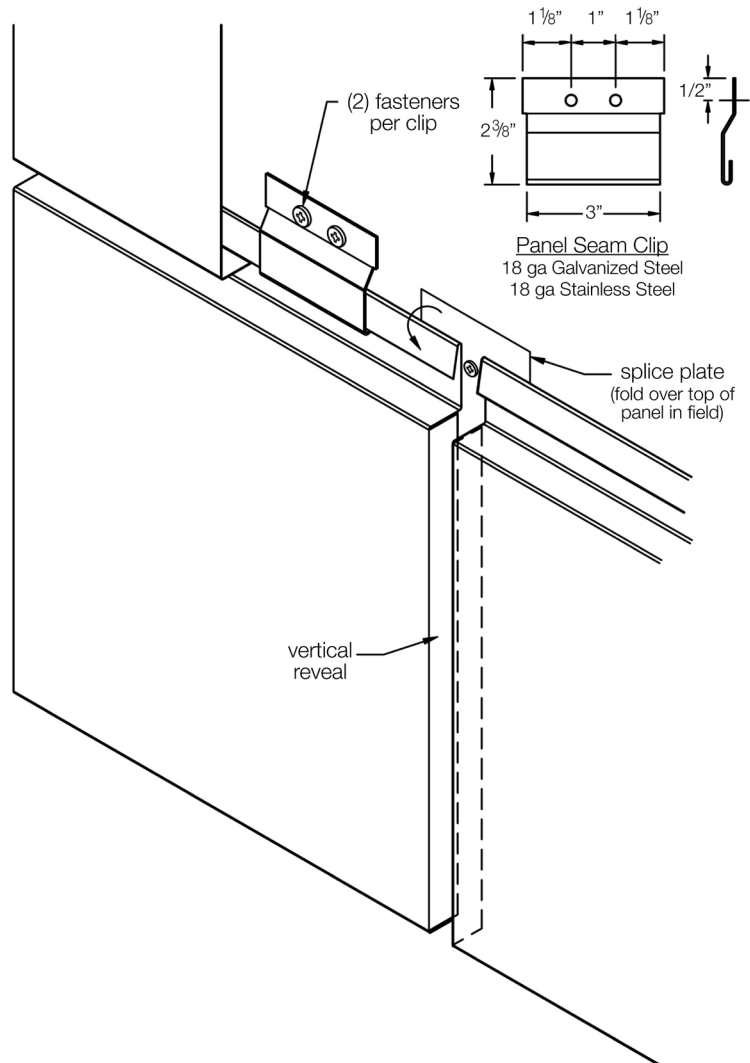

- Aluminum: .040", .050", .063", .080"
- Stainless Steel: 20 & 22 gauge
- United Zinc: 0.8mm, 1.0mm*
- Copper: 16, 20 & 24 ounce

Testing

- AAMA 509.9
(when used in a Rainscreen assembly)
- ASTM E 283

Warranties

- Finish Warranty
- Watertightness Warranty available for IntelliScreen Systems

* 0.7mm United Zinc is available upon request. Please contact your IMETCO sales professional for information on lead time and minimum order quantity requirements.
